

**Dr. Marcelo A. Suarez**

Dr. Marcelo Suarez completed his training as a General Surgeon, specializing in vascular surgery, and is recognized as an authority in the subspecialty of phlebology. Dr. Suarez has pioneered the exploration of new technologies for the treatment of vein-related disorders. He has developed original surgical procedures in cosmetic surgery, developed a technique for auto-grafting and autologous adipocyte transplantation, developed a proprietary technique for follow up CO<sub>2</sub> laser resurfacing techniques, and conducted animal and human clinical trials on wound healing and laser tissue interaction.

Dr. Suarez has been involved in physician training programs for 32 years including many topics in clinical dermatology, cosmetic dermatology and dermatological surgery. He has been developing Continuing Medical Education programs from the time he received his board certification in cosmetic medicine in 1998; working in conjunction with CME committee/advisory boards; education companies and communication companies; university health science centers; state/regional/local medical societies, The American Academy of Aesthetic Medicine and state/regional CME organizations, he is integrally involved in the educational planning and speaker of certified activities, including needs assessment, the writing of educational objectives, and evaluation of program effectiveness in meeting identified needs of continuing medical education (CME) programs and symposia for physicians, pharmacists, nurses, and other health care professionals in the United States, Asia, Middle East and Europe.

Dr. Suarez sits on several Scientific Advisory Boards and is a Consultant for Acne Research Institute; American Academy of Aesthetic Medicine; He has published numerous articles in a variety of Medical Journals.
